perfect32.com

There are **7,800** new cases of mouth cancer diagnosed in the UK every year and one person dies from it every three hours.

Better awareness and prompt detection saves lives - early diagnosis improves survival chances to 90 per cent. **Regular examinations with your dentist** ensure you are professionally screened for the signs of mouth cancer.

IF IN DOUBT, GET CHECKED OUT

Remember to look out for:

- **Ulcers that do not heal within three weeks**
- **Red & white patches in the mouth**
- **Unusual lumps or swellings in the mouth**
